

# Installation manual

1. Test lighting: Connect the lamp body to the power supply and test lighting to confirm whether the lamp is intact and can light up.

2. Installation: Use a screw garden to fix the circular hanging plate in the position where it needs to be installed on the ceiling. Next, connect the main line and power line of the lighting fixture, and then install the ceiling panel. Secure it onto the scraper with screws.

3. Light source: The lamp comes with an energy-saving LED light source.

4. Adjust the height of the lamp body to a height of 2.2-2.8 meters above the ground. Last just turn on the lights and test them

**Attention: This product is for indoor use only!**
